15B. CONTRACTOR/OFFEROR		15C. DATE SIGNED		16B. UNITED STATES OF AMERICA BY _____		16C. DATE SIGNED	
(Signature of person authorized to sign)				(Signature of Contracting Officer)			

1.2 SOURCES AND EVALUATION TESTING

Stone shall be obtained in accordance with the provisions of Paragraph 1.14, Section 00800. The Contractor shall submit suitable test reports and service records to show the acceptability of the stone. If the Contractor proposes to furnish stone from a source not currently listed, the Contractor will make such investigations as necessary to determine whether acceptable stone can be produced from the proposed source. Satisfactory service records on work outside the Corps of Engineers will be acceptable. In order for stone to be acceptable on the basis of service records, stone of a similar size must have been placed in a similar thickness and exposed to weathering under similar conditions as is anticipated for this contract, and have satisfactorily withstood such weathering for a minimum of twenty years. If no such records are available, the Contractor will make tests to assure the acceptability of the stone. The tests to which the stone may be subjected will include petrographic analysis, specific gravity, abrasion, absorption, wetting and drying, freezing and thawing and such other tests as may be considered necessary by the Contracting Officer. The following guidance is provided for use by the Contractor in analyzing a new source of stone. Stone that weighs less than 155 lbs/c.f. or has more than 2% absorption will not be accepted unless other tests and service records show that the stone is satisfactory. The method of testing for unit weight will be CRD-C 106. The method of testing for absorption will be CRD-C 107. Samples shall be taken by the Contractor under the supervision of the Contracting Officer at least 60 days in advance of the time the placing of the stone is expected to begin. The Contractor has the responsibility to assure the tests are performed in accordance with applicable Corps of Engineers' methods of testing given in the Handbook for Concrete and Cement, and will be performed at a Waterways Experiment Station approved testing laboratory. The cost of testing will be borne by the Contractor.
